Experience

HOGAR DE LIBROS | **React typescript · Flowbite · Nest.js & MYSQL**

University-supervised internship – Development of a web application at optimizing the operations of the Municipal Library of Nicoya. The project used a modern tech: React with TypeScript for the frontend, enhanced with Next.js for advanced routing and component handling, and Nest.js running on Node.js for the backend. Integrated tools and libraries included Flowbite-React, React Hooks, and various npm packages. Implemented a secure authentication and authorization system using JWT. Contributed to quality assurance (QA), user manual creation, and version control using Git. The project followed the Scrum agile methodology.
